

GODSTIME AMEMENOGHENA SUNDAY

FRONTEND WEB DEVELOPER

Email: sundaygodstimegt1@gmail.com | Phone: +2347065018799

Portfolio: <https://sgodstime.vercel.app> | LinkedIn: <https://linkedin.com/in/godstime-sunday>

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive and user-focused web applications using React, Next.js, TypeScript, and Tailwind CSS. Experienced in developing real-world features such as authentication flows, dashboards, and interactive user interfaces, with a strong focus on clean, maintainable code and component reusability. Comfortable working with REST APIs, modern development tools, and collaborating within team environments. Committed to improving user experience, performance, and continuously growing as a frontend developer.

SKILLS

- Technical Skills: HTML5, CSS3, Javascript (ES6+), Typescript
- Tools and technologies: Git & Github, REST APIs, Supabase, SEO Basics, Figma
- Frameworks and Libraries: React, Next.js, Tailwind CSS, Shadcn/ui

WORK EXPERIENCES AND PROJECTS

Frontend Developer Intern

Dominion Youth Empowerment Network (DYEN), Warri

March - June 2022

- Developed and maintained responsive websites using modern frontend technologies
- Collaborated with team members to deliver multiple web projects within deadlines

Alternative Credit Engine Web Application

March 2026

Tech Stack: React, Tailwind CSS, shadcn/ui

Live Project: <https://cred-axis-beryl.vercel.app>

Github: <https://github.com/Gt1code/CredAxis>

- Led frontend development of authentication flows (signup, OTP login, password reset)
- Built a lender dashboard with real-time search and data visualization
- Implemented protected routing and reusable component architecture

E-Commerce Product Page

February 2026

Tech Stack: React, CSS

Live Project: <https://dessertlist.vercel.app/>

Github: <https://github.com/Gt1code/product-cart-list>

- Built a fully responsive product page with image gallery and cart functionality
- Implemented dynamic cart update using React state and localStorage

The Corporated BrandUp LTD - Business Landing Page

November 2025

Tech Stack: React, Tailwind CSS, Framer-motion

Live Project: <https://www.thecorporatebrandupltd.com>

Github: <https://github.com/Gt1code/brandup>

- Developed a responsive business landing page
- Implemented smooth animations and interactive UI components to enhance user engagement

Portfolio Website

March 2026

Tech Stack: Next.js, Tailwind CSS, Framer-motion

Live Project: <https://sgodstime.vercel.app/>

Github: <https://github.com/Gt1code/portfolio-v4>

- Designed and developed a personal developer portfolio

Notepad App

March 2026

Tech Stack: React, Context API, localStorage

Live Project: <https://notepad-v1.vercel.app/>

Github: <https://github.com/Gt1code/notepad>

- Built a fully functional note-taking web application using React with global state management via Context API
- Implemented complete CRUD functionality for efficient note management
- Persisted user data using browser localStorage to maintain notes across sessions
- Developed real-time search functionality with instant filtering by note title
- Implemented scoring features by date and title to improve organization and accessibility of notes

EDUCATION

Federal University of Petroleum Resources, Effurun (FUPRE)

Bachelor of Engineering (B.Eng.) in Mechanical Engineering - In progress

January 2023 - Present

Expected Graduation: 2027

CERTIFICATIONS

- Dominion Youth Empowerment Network (DYEN): Web Development Internship
Completed - June 2022
- Techyjaunt: Frontend Development Course
Completed - March 2026
